PYRAN[®] Platinum F

by **SAFTIFIRST**

Manufactured by SCHOTT Technical Glass Solutions

20 to 180* Minute Fire Protective Safety Ceramic For Doors, Sidelites and Openings

- The first fire rated glass ceramic made specifically for architectural applications.
- Advanced manufacturing process eliminates noticeable distortion typical of other ceramics without the added cost of surface polishing.
- Scratch-resistant surface applied security film meets CPSC Cat. I and II impact safety.

Price: \$78.00 per square foot
(discounted pricing over 10.0 SF, 2.0 SF min/lite)

20 to 90* Minute Fire Protective Safety Wired Glass For Doors, Sidelites and Openings

- Patented safety wired glazing that meets the impact safety requirements in the current IBC.
- Scratch resistant surface applied security film meets CPSC Cat. I and II impact safety.
- Ideal low-cost replacement for unsafe traditional wired glass.
- Available in misco (diamond) pattern.
- Made in the USA for fast delivery and competitive pricing.

Price: \$35.20 per square foot
(discounted pricing over 10.0 SF, 2.0 SF min/lite)

Contact MAG for quotations on these and other fire-rated glazing products from SaftiFirst

*** Applications using fire protective glass in ratings 60 minutes and over are limited to 100 square inches in temperature-rise doors. This product is not a barrier to radiant heat and does not meet ASTM E-119.**
